

# AMS 2750 E/CQi-9 GOES MOBILE

Improving Factory Quality Control

# AMS 2750 E/CQI-9 GOES MOBILE

## Convenient audit management

Heat treatment plants for automobile or aircraft components must be continuously audited according to the applicable standards. These standards are mostly related to instrumentation that demonstrates system accuracy and temperature uniformity. In order to ensure continuous AMS 2750 E/CQI-9 auditing holistically and without major bureaucracy, Tenova LOI Thermprocess has developed an all-in-one software solution. This allows the audit procedure to be completed directly and paperlessly at the plant using a mobile panel or tablet. Thanks to the instrumentation provided by Tenova LOI Thermprocess, the audit can be carried out and reported by only one auditor without additional personnel during production.

### OUR HIGHLIGHTS... YOUR ADVANTAGES:

- Auditing of SAT check possible on regular working days during production
- Paperless AMS 2750 E/CQI-9 documentation
- Convenient mobile touch panel or tablet for on site entry of measurement and verification data
- Convenient PC-based audit management and reporting
- Easy scheduling of audit procedures
- Plant-specific parameters
- Convenient management of thermocouple data (e.g. type, supplier, interpolation values...)
- Convenient management of measuring instrument data (e.g. type, supplier, calibration values...)
- SAT report (System Accuracy Test)
- TUS analysis (Temperature Uniformity Survey) and report
- Direct application of logger result data to TUS procedure

Tenova LOI Thermprocess supplies intensive consulting and operation support for the implementation and execution of customer audit procedures.
